

**FAILURE ANALYSIS ENGINEER – HERTFORDSHIRE BASED**

**Expert in device and display testing methodology with a passion for excellence?**

**Are you decisive, able to investigate and identify failure causes? Do you want to work for one of Europe's leading technology developers?**

If yes then this is an excellent **career opportunity for you to join** Europe's leading technology development and engineering company.

To be considered for this opportunity, you will ideally have a degree or equivalent, in Physics, Optical, Optoelectronics, Electronic or Electrical Engineering or a related subject. A proven track record of good work experience in failure analysis with experience in clean room or a similar hi-tech environment would be necessary. Previous knowledge of optoelectronic devices and their construction is essential, as is strong computer literacy and the ability to write code for data analysis

As a Failure Analysis Engineer your role will understand device and display construction and fabrication processes in order to feedback failure analysis data to the project teams , investigate and assign failure codes and types to devices under test, as well as generating a Pareto of failure codes and a breakdown of yield for each type of device and display

Based near Cambridge, UK

Excellent career prospects, salary and benefits

If you feel you could become part of a world-leading Company in the above role and are interested in learning more about this important position we are eager to hear from you
