

Group Leader- Surgical Intervention Group- Cambridge

Come on! Take the Lead!!

Would you like to work in an area of cutting edge technology where initiative and creativity are rewarded?

Do you love to be “hands on” but also have the ability to mentor, lead and delegate on a variety of technically challenging development projects.

If yes then this is an excellent career opportunity for you to join leading technology development and engineering company

To be considered for this opportunity, you will ideally have an excellent degree in Engineering or closely related disciplines. A Proven track record of good work experience in developing surgical or medical products, a thorough understanding of the regulatory framework in which medical products are developed and proven leadership ability would be necessary.

As a Group Leader your role will be to manage a team of engineers & scientists in the Surgical & Interventional Products Group to deliver the Group’s target financial performance. The role will include line management of the Group members, recruitment to achieve Group growth and performance targets, sales support to the Surgical & interventional Business Development Process and Project Management.

If you feel you could become part of a world-leading Company in the above role and are interested in learning more about this important position we are eager to hear from you

Based near Cambridge, UK

Excellent career prospects, salary and benefits

If you or anyone you know would like to work for the UK’s leading Technology development company in their Medical Technology division, we would like to hear from them
