

Programme Manager- Product and Systems Division- Cambridge Based

Apply your Top class Management skills to real world solutions!

This is your chance to join a reputable Technology Development company working with leading names in the commercial world. Providing your highly creative Engineering and Management skills to the design and development of a wide variety of exciting and technologically advanced products. You will be managing challenging and often complex product and system development for clients in a wide range of market sectors. The position involves the management of projects through the complete development lifecycle, from requirements definition through to final delivery. You will be involved in proposal preparation, selection of the team, negotiations with 3rd parties, managing concept generation, analysis of the system architecture, liaison across engineering disciplines and the specification, implementation and testing of the design.

To qualify this role you should have a good degree in engineering, plus substantial industrial experience working in product / system design and development. Proven track record in the management of large multi-disciplinary projects

Based near Cambridge, UK

Excellent career prospects, salary and benefits

If you feel you could become part of a world-leading Company in the above role and you are interested in learning more about this important position we are eager to hear from you.
