

Technical Architects / Project Managers for Scientific Applications

Eager to apply your Software Skills to the Scientific World!

Opportunity for enthusiastic Project Managers with strong information technology skills to join hands with the Leading Scientific Company who solve complex technical and business problems using their scientific, engineering and IT skills.

You will be responsible for taking projects from the first meeting with a prospect through to delivery. You will be working with sales staff to understand the client's problem and helping to create a persuasive response that secures the business, gathering requirements, analyzing the needs and feeding those back to the client, architecting a technical solution, managing the project, being an active line manager to the staff. You will also be working on interesting projects for the leading organizations.

You will have both Scientific and Software Engineering background and an interest in these areas is essential. You will have a numerate degree, with experience of software development and of designing solutions and a track record of Project Management. You will also be able to show consultancy skills.

Based in Abingdon, Burton-UK

Excellent salary, benefits package and attractive future prospects will be offered to the right candidate.
